

## Bessie Falls

25 May 2020

Over view – 1.48km from car to top of falls. Approx 32 min continuous walking. From 8 m to 159 m elevation.

Head over towards Yarrabah and as you round Bessie Pt the road heads away from the coast and crosses Mick Ck.

Just before the bridge a road heads upstream,. You can drive in about 100 m. A rough trail follows the creek upstream bordering a private property. Keep well away from the cleared grounds. The trail soon picks up the access road to some Council water infrastructure and stops near a water tank. You can take the lower road to near the base of the bottom set of falls or you can take the steep, rough trail next to the water tank that takes you to the top of the highest falls. Rocks can be slippery around the falls after rain..
